Network Solution

Arthur Pai

CLIENT SIDE

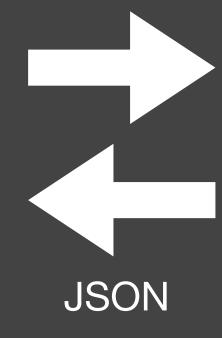

SERVER SIDE(HTTP)

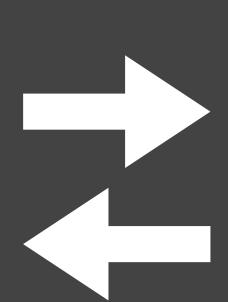

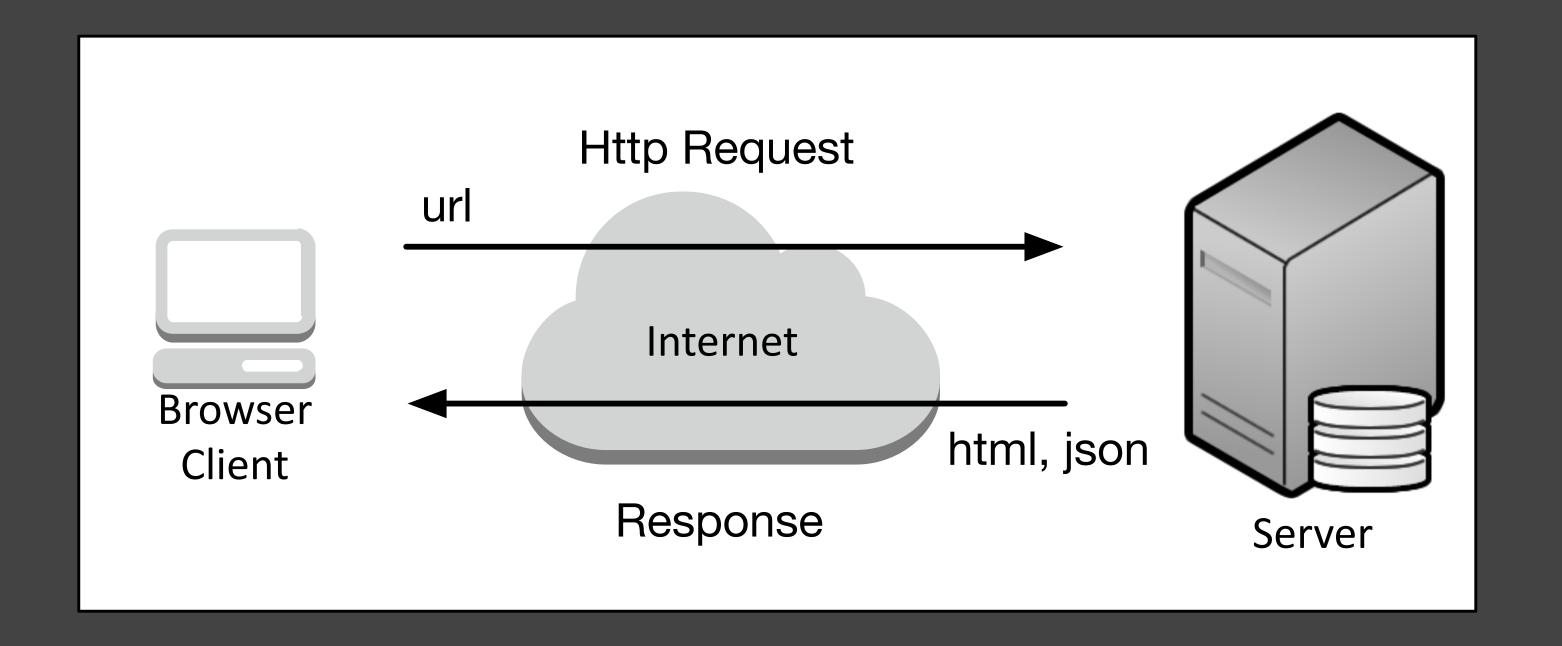

SERVER SIDE(SOCKET)

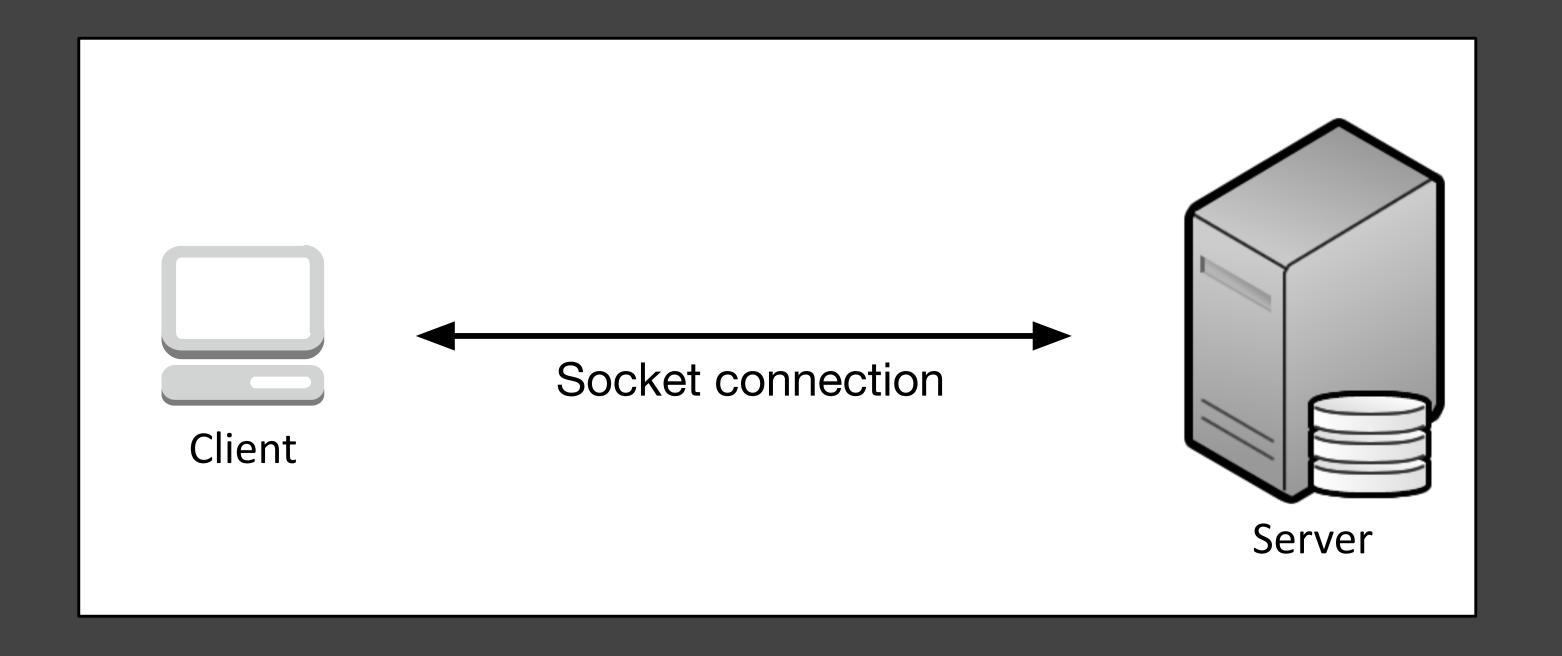

HTTP SERVER

- 弱聯網
 - 當需要傳送 Request 時,才會建立連線(create connection)
 - 當 Server 回傳 Response 完成後,就會立即斷線 (disconnect)

SOCKET SERVER

• 強聯網

- 長連線:連線建立後,直到遊戲結束才會斷線
- 雙向溝通(two way communication)
- 實時性:比 HTTP server 低延遲 (Low latency)

DATABASE

(Relational Database)

NoSQL JSON Document
